

(On Organization Letter Head)

To  
eSign on-boarding team  
eMudhra Limited  
Bangalore

**Subject:** Proposed Model of eSign integration at our organization

**Reference:** On-boarding application and documents to eMudhra

We are currently providing a feature which involves the process of getting wet signatures from the customers for following purposes:

1. \_\_\_\_\_
2. \_\_\_\_\_
3. \_\_\_\_\_
4. \_\_\_\_\_
5. \_\_\_\_\_

By becoming an ASP it will add option for verification with Aadhaar Number. The process will be as follows:

1. Once the customer opts for entering Aadhaar number, we will pass this number and authentication information for performing eSign. The authentication will be carried out using OTP and/or Biometric based authentication.
2. We will generate document hash for the document to be signed.
3. Send the document hash with Aadhaar and authentication information (OTP / Biometric) to perform eSign.
4. eMudhra generates electronic signature (eSign) corresponding to original document.
5. eMudhra responds signature value, which will be embedded to the PDF form.
6. On completion of signing process, we proceed with further steps.

We believe the above information is in line with the requested matter.

Thanking you,

For \_\_\_\_\_,

(Authorized Signatory)
